## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

### ***Allowable Subject Matter***

2. Claims 1-9 and 11-17 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter:

The cited prior art of record considered as a whole (either alone or in combination) fails to teach or suggest

“plurality of prepit forming regions are disposed apart from one another by a distance which is 300 or more times a recording channel bit length along said recording track, each of said prepit forming regions having a fixed length which is 36 or less times said recording channel bit length along said groove or land, said prepit forming regions having a fixed length which is three or less tracks long along said radial direction and being disposed not adjacent to one another in said radial direction.”

### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claim 10 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which

Art Unit: 2627

was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Regarding claim 10, the claim language that states “a wobble cycle equal to  $1/n$  of a frame cycle” is not supported by the specification.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 10, the claim language that states “a wobble cycle equal to  $1/n$  of a frame cycle” is not clear. There is no description for what “n” represents in the claim.
